# Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

## CONTRAST

 Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

## NAVIGATION

 Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

## NAMES AND LABELS

 **<frame> or <iframe> elements do not have a title**

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.
